The drawings are objected to because Figures 3a, 3b, 4a, 4b, and 5 either are photocopies of photographs wherein the contrast is too poor to distinguish separate elements discussed in the specification relating thereto nor are the lead lines distinguishable in these Figures. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16, 31, 32, 44, and 45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 " the modified laser beam" lacks positive antecedent basis. Claims 13, 31, and 44 and 14, 32, and 45, respectively are substantial duplicates. In claim 15 exactly what is intended to be encompassed by the term "more rounded" is unclear.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7-12, 15-17, 20-22, 24-27, 30, 33-38, 43 and 47 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kittrell et al.

Claims 1, 2, 4, 7-11, 15,17, 19-21, 26, 27, 29, 30, 33, 35, 36, 42, and 46 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hammer et al.

Art Unit: 3735

Claims 1-3, 6-10, 15,17, 18, 21, 23-28, 30, 33, 40, and 41 are rejected under 35

U.S.C. 102(b) as being clearly anticipated by Miller.

Claims 1, 2, 6-10, 13-17, 21, 23-27, 30-36, 40, and 44-47 are rejected under 35

U.S.C. 102(b) as being clearly anticipated by Fischer et al.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 5, 35 and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer et al in combination with Mann et al. Fischer et al teaches a device and method such as claimed except for the laser. Mann et al teach the equivalence of Ho:YAG and THC:YAG lasers for medical purposes. It would have been obvious to the artisan of ordinary skill to employ the laser of Mann et al in the device and method of Fischer et al, since these are equivalents thus producing a device and method such as claimed.
